

# Bernard Dalsin Manufacturing Product Announcement

## New Leak Proof - 1 Piece Elbow added to the Bio Vent® Product Offering

Bernard Dalsin Manufacturing introduces our completely leak proof one piece elbow as a new product addition to the Bio Vent™ complete line of components. The inner flue of the elbow is now made from one continuous piece of stainless steel. Competitors' pellet vent elbows have multiple seams in their construction and are manually caulked at each seam. The problem with the caulking method is that if there is any spot on the seam that is missed when manually caulking, the elbow will leak. Also, the caulk can become brittle and over time fail to make a complete seal.

As with all Bio Vent components, the elbow 's inner flue is made with AL-294C, super ferritic stainless steel that can withstand exhaust from bio-fuels that can cause extensive corrosion in other types of stainless steel commonly found in competitors' vent systems.

This new elbow also uses our gasket-sealed connection. This exclusive pre-installed gasket makes installation time a fraction of the time of other conventional venting products and eliminates the possibility of leakage at the connection point.

Tested and listed with Omni Laboratories. 10 year warranty.

Order #	Description	Carton Qty
71024503	3" 45 Deg Bio Vent Elbow	6
71024503B	3" 45 Deg Bio Vent Elbow Black	6
