

# Bernard Dalsin Manufacturing Product Announcement

## Gasketed Tee added to the Bio Vent® Product Offering

Bernard Dalsin Manufacturing introduces a Gasketed Tee new product addition to the Bio Vent® complete line of components. The new Gasketed Tee will NOT leak where the branch meets the main. The new Gasket will be available on regular, starter and double tees in the Bio Vent® product line.

As with all Bio Vent® components, the Gasketed Tee's inner flue is made with AL-294C, super ferritic stainless steel that can withstand exhaust from bio-fuels that can cause extensive corrosion in other types of stainless steel commonly found in competitors' vent systems.

This new Gasketed Tee also uses our gasket-sealed connection. This exclusive pre-installed gasket installs in a fraction of the time of other conventional venting products and eliminates the possibility of leakage at the connection point.

Tested and listed with Omni Laboratories. 10 year warranty.
