

Bernard Dalsin Manufacturing Product Announcement

Masonry Adaptor added to the Bio Vent® Product Offering

Bernard Dalsin Manufacturing introduces a Masonry Adaptor as a new product addition to the Bio Vent® complete line of components. This dual function adaptor will conveniently connect the Bio Vent pipe to an existing all fuel chimney. Alternatively, this can be used as an adaptor to go through an existing masonry thimble and connect to stainless steel flexible liner in the chimney.

As with all Bio Vent components, the Masonry Adaptor is made with AL-294C, super ferritic stainless steel that can withstand exhaust from bio-fuels that can cause extensive corrosion in other types of stainless steel commonly found in competitors' vent systems.

Tested and listed with Omni Laboratories. 10 year warranty.

Order #	Description
71092603	3" TO 6" CLASS "A" PIPE - MASONRY ADAPTOR/INCREASER BIO VENT
71092604	4" TO 6" CLASS "A" PIPE - MASONRY ADAPTOR/INCREASER BIO VENT
